KARCHER

DESIGN

AND THE WINNER IS ...

Black doesn't only look good in your wardrobe! The new cosmos black finish has a matt black appearance. Since 2016 they have been an essential part of the KARCHER DESIGN Black Edition and the range is regularly updated with new products.

The finish is applied electrostatically as a powder coating. This procedure does not require the use of solvents creating an eco-friendly high-quality product. KARCHER DESIGN door handles in "Cosmos Black" are scratch-proof as well as highly resistant to corrosion. Their powder coating has a unique and pleasant depth to it while the surface itself feels smooth and warm, not unlike that of a palm stone.

Our black products also impressed the jury of the French MIAW Award 2018 and they chose them as the winner. Most products in the "Cosmos Black" range are also available in "Oil rubbed bronze". That includes the square rose version, window handles, glass door locks and a variety of other stainless steel accessories.

The finish itself is dark brown and has a very smooth surface which gives the door handles a rather warm tone and makes them pleasant to use. Every model in Oil Rubbed Bronze has fine bronze colored contours, the defining feature of this elegant color.

Within a very short time, our black assortment was met with great enthusiasm by numerous architects in the USA and Europe. At the Kimpton DeWitt boutique hotel in Amsterdam, our Cosmos Black products enhance the ambience and give the interior a complete and stylish look. The products fit perfectly with the other high-quality room elements. At the same time, the black color contrasts with warmer wooden elements, such as the ceiling beams and cupboards.

Also in the prestigious Design Hotel Au Boeuf Couronne our Cosmos Black pull handle ES3 and our door handle, Madeira ER45 in Cosmos Black, decorate the doors of the hotel rooms. These harmonize perfectly with the other matt black elements in the room.

Visit us at www.karcher-design.co.uk and learn more about our Cosmos Black range.
